

Jafco Flame Safety Glasses

Description

The Jafco Flame Safety Glasses are available with either clear or smoke polycarbonate lenses to suit different working environments. Clear lenses provide dependable eye protection with clear, undistorted vision for indoor and general-use applications, while smoke lenses help reduce glare and brightness, making them ideal for outdoor work and well-lit conditions. Featuring a durable impact-resistant polycarbonate construction and a distinctive orange and black frame, these safety glasses combine reliable protection, comfort, and modern styling for everyday industrial, workshop, and site use.

Features
